

# Archenerg Cluster

International Innovative cluster for Renewable Energy and Building Trade

## MISSION

Archenerg incorporates 80 SMEs and other organizations from Hungary with the aim to create an economic and social model based on renewable energy efficiency that moves green economy enterprises and society towards a more sustainable future.

The goal of the cluster is to increase public awareness about renewable energy and energy efficiency and become an active partner in building a circular economy on a global scale. ArchEnergy supports its members in the transition to circular and digital construction.

## SERVICES

Project generation, demand and needs assessment

Cluster building, management and networking

Training and curriculum design

Support in transition to a circular economy

Consulting for innovation and business development

Information and promotion

R & D and innovation projects, searching for financial solutions

Internationalisation in Europe and in third countries

## PROJECTS

ArchEnergy is involved in several projects:

ICBUILD: Internationalization of complex circular solutions (ESCP4i, COSME)

Greener-Pro: green business development in public procurement in the Middle East and Asia

Which support different domains such as:

solar energy utilization, installation of photovoltaic and solar systems

geothermal energy utilization, installation of heat pump systems

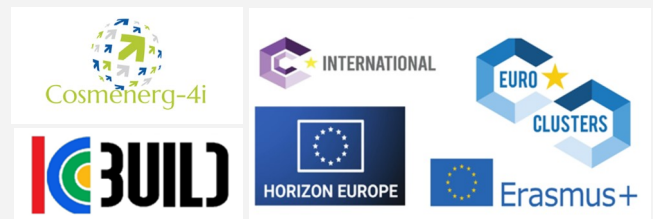

biomass utilization, compact biomass

prefabricated and passive houses

buildings and engineering

GO DIGITAL  
GO CIRCULAR  
GO INNOVATIVE  
GO INTERNATIONAL
