The project started on 1st of July 2021 and will run for a period of 32 months.

Co-funded by the European Union's COSME Programme

GREENERG-PRO

Boosting untapped green business development in public procurement in the Middle East and Asia

THE THINGS YOU WISH YOU KNEW ABOUT PUBLIC PROCUREMENT

The focus of the GREENERG-PRO initiative is to develop an internationalization strategy and implementation roadmap for three partner clusters in Hungary, Poland, and Serbia to enhance the skills of the partner clusters' management and their members (SMEs) in the field of international public procurement. We aim to help companies to explore and target government procurement;

IN THE MARKETS OF

ISRAEL, SINGAPORE, VIETNAM, AND TAIWAN

We planned a set of integrated actions to increase the capabilities of cluster members to enter the public procurement market;

IN THE FIELD OF

RENEWABLE ENERGY AND ENVIRONMENTAL TECHNOLOGIES

We develop a tool for tender alerts and automatic digest/newsletter, set up a permanent joint department to provide technical support and assistance to members,

conduct surveys for needs assessment and benchmarking of ecosystems' organizations in public procurement,

implement exploratory missions and trade missions with SMEs to the target countries,

organize trainings and international webinars for B2B and B2P, and develop a guideline with best practices and lessons learned.
